

# Hillstone Networks Firewall Training and Certification

Hillstone Certified Security Associate (HCSA)

## Your First Step Toward Cybersecurity Expertise

In today's fast-changing cyber world, the HCSA certification is the ideal starting point for newcomers and junior professionals. It validates your ability to deploy and manage Hillstone Networks' Next-Generation Firewall (NGFW) and introduces you to modern security concepts such as Zero Trust and AI-driven operations.

## Who Should Attend

- ◆ Junior engineers, IT support staff, and system administrators.
- ◆ University students studying networking or cybersecurity.
- ◆ Hillstone Networks' partners and customers needing baseline skills.

## Key Benefits

- ◆ Gain a vendor-recognized credential for your resume.
- ◆ Hands-on labs covering core NGFW features.
- ◆ Learn to protect networks with Zero Trust and Threat Prevention fundamentals.

## Core Topics

- ◆ NGFW deployment, VLANs, routing, NAT, and VPNs.
- ◆ Asset & Identity Management.
- ◆ Zero Trust Network Access (ZTNA).
- ◆ Granular Security Policies.
- ◆ Advanced Threat Protection (IPS, AV, URL Filtering, C&C).
- ◆ Threat Log Analysis & AI-driven O&M.

## Exam Details

- ◆ Multiple-choice questions.
- ◆ Duration: 90 minutes.
