

Hillstone Networks Firewall Training and Certification

Hillstone Certified Security Expert (HCSE)

Master the Architecture — Lead the Most Complex Security Projects

HCSE represents the highest level of Hillstone Networks certification, proving your mastery of advanced architecture, threat analysis, and troubleshooting across the entire security stack. It is designed for senior engineers and architects who shape large-scale or high-security deployments.

Who Should Attend

- ◆ Senior engineers and architects with 5+ years of cybersecurity experience.
- ◆ CTOs or experts responsible for enterprise, data center or cloud security.

Key Benefits

- ◆ Demonstrate top-tier expertise recognized across the industry.
- ◆ Master XDR, EDR, and incident forensics for proactive defense.
- ◆ Lead complex projects and troubleshoot at expert level.

Core Topics

- ◆ Security Architecture Design & Optimization.
- ◆ Advanced Threat Analysis (XDR and EDR for threat hunting and forensics).
- ◆ Cross-Product Troubleshooting of complex issues.
- ◆ Capstone Lab simulating real-world solution design and incident handling.

Exam Details

- ◆ Comprehensive hands-on lab (solution design + troubleshooting).
- ◆ Duration: 7 hours.
