

Hillstone Networks Firewall Training and Certification

Hillstone Certified Security Professional (HCSP)

Advance Your Skills — Design and Implement Multi-Product Security Solutions

As networks grow more complex, engineers need advanced skills to integrate multiple security technologies. The HCSP certification validates your ability to design, deploy, and optimize Hillstone Networks' solutions across enterprise and hybrid cloud environments.

Who Should Attend

- ◆ Security engineers with 1–3 years of experience.
- ◆ Professionals responsible for enterprise network security architecture.
- ◆ Partners and customer engineers ready for senior roles.

Key Benefits

- ◆ Deepen your expertise across Hillstone Networks' portfolio.
- ◆ Learn high availability, intelligent networking, and application security.
- ◆ Position yourself for senior security engineering roles.

Core Topics

- ◆ High Availability (HA) deployments.
- ◆ Intelligent Networking (SD-WAN, Secure DNS, Link Load Balancing).
- ◆ Application Security (WAF & ADC).
- ◆ Cloud Security for public and private clouds.
- ◆ Platform Management (RESTful API, NetFlow, Docker).
- ◆ Security Operations Platform (Hillstone XDR for unified detection & response).

Exam Details

- ◆ Multiple-choice questions.
- ◆ Duration: 120 minutes.
